Every industry can benefit from online auctions.

With online auctions, you can reach your target group anywhere around the world. This means bigger reach, which leads to more transparent bidding and higher auction revenue. Don't want to let go of offline auctions just yet? No problem. Our hybrid auctions let you have the best of both worlds.

Features

Our 10 years of experience have taught us what our clients want and what they value the most. We have translated the needs of our clients into the following features:

High Quality Video

Online bidders have no disadvantage when it comes to getting a good impression of the auctioned object.

Real-time

Video streaming and bidding without Delays.

Customizable interface

So you don't have to sacrifice your brand identity for user convenience.

Connect to existing data

Possibility to interlink between existing business data and -systems. Or upload via our CSV upload.

Security

Our auction technology protects your and your user's data, as well as the anonymity of anonymous bidders.

Performance

We have experience with big auctions and can accommodate large amounts of people accessing the server at once.

Different auction types

We have experience with multiple bid-options. Hybrid, online, silent, it is up to you which type of auction suits you.

Full control

Our system is bullet-proof, you don't need a trained operator to manage the auction.

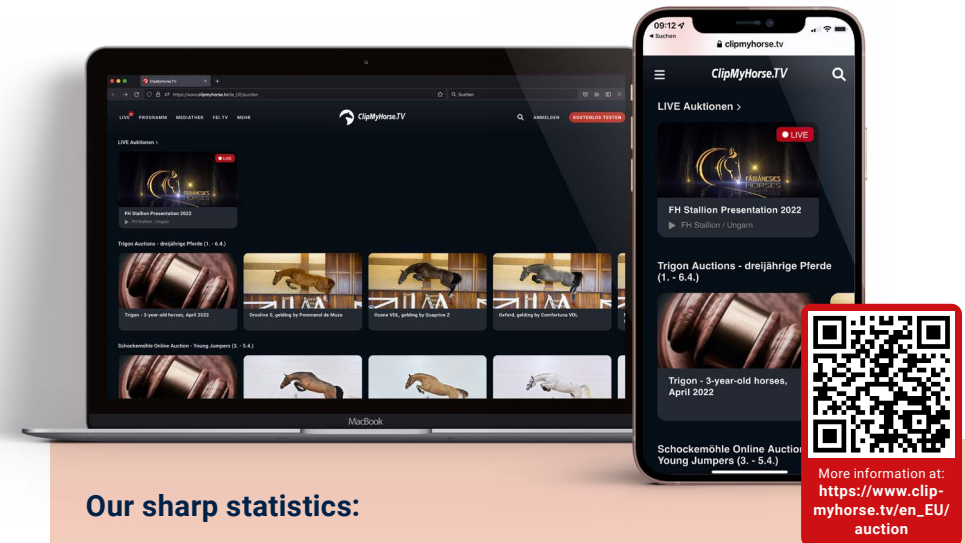

Data security

The data collected within your online auctions belongs to you and only you.

Working with ClipMyHorse.TV Auctions gives you:
